

IBM Watson IoT Platform and Device

- It is powerful web dashboard Flexible, scalable and easy to use.
- We provide a clean and simple UI where you can simply and easily add and manage your devices, control access to your IoT service, and monitor your usage. See at a glance the things you are interested in.
- It can do some:

Device Management

- Using our device management service, you can perform device actions like rebooting or updating firmware, receive device diagnostics and metadata, or perform bulk device addition and removal.

Responsive, scalable connectivity

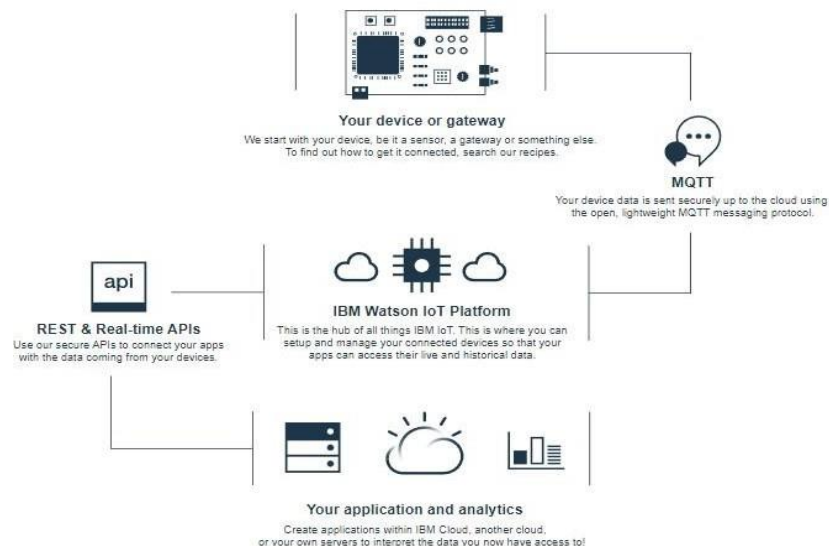

- We use the industry-standard MQTT protocol (OASIS ratified) to connect devices and applications. MQTT is designed for efficient exchange of data to and from devices in real-time.

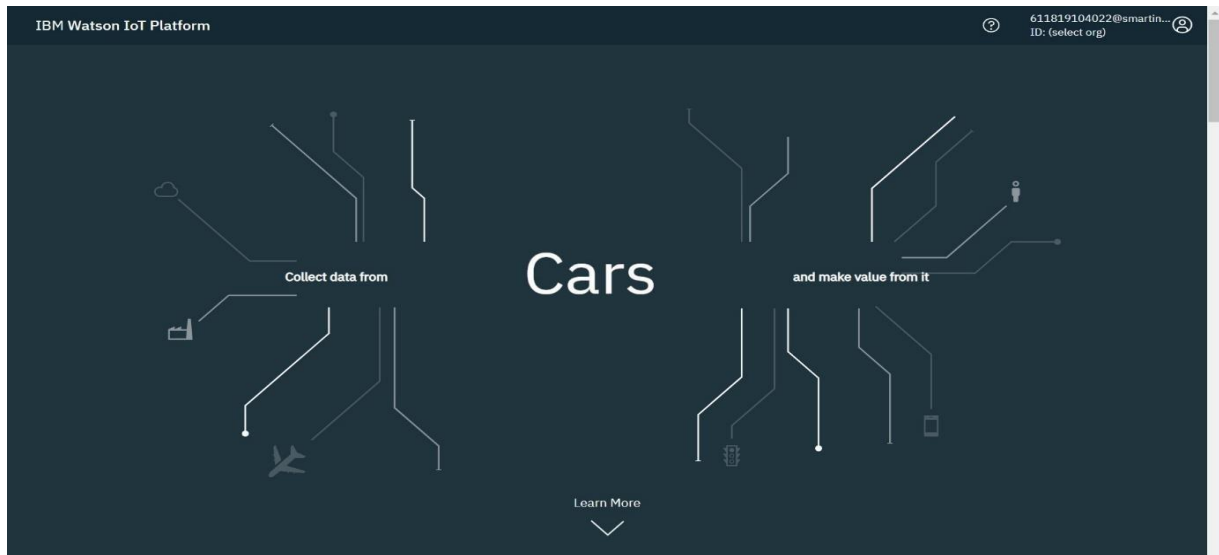

Secure Communication

- Securely receive data from and send commands to your devices. Do this using MQTT with TLS to secure all communication between your devices and our service.

Data lifecycle management

- As well as having access to real-time data coming from your devices, you can opt to store data for a period of your choice, allowing you to have access to historical and real-time data for your devices.

The image shows the 'Browse' page in the IBM Watson IoT Platform. The header includes the platform name and a user profile with ID 611819104022@smartin... and a dropdown for organization selection. The main content area has a dark blue sidebar with navigation icons. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue 'Add Device' button is in the top right. Below the navigation bar is a text block explaining that the table shows a summary of all devices and can be filtered, organized, and searched. A search bar labeled 'Search by Device ID' is present. To the right of the search bar is a 'Device Simulator' toggle switch. Below these is a table with the following columns: Device ID, Status, Device Type, Class ID, and Date Added. The table contains two rows of data. At the bottom of the table is a pagination bar showing 'Items per page 50' and '1-2 of 2 items'. A '1 Simulation running' notification is visible at the bottom right of the table area.

Device ID	Status	Device Type	Class ID	Date Added
09	Disconnected	IoT	Device	Oct 18, 2022 8:00 PM
12	Disconnected	abcd	Device	Oct 15, 2022 1:31 PM

The image shows the 'Device Drilldown - 09' page in the IBM Watson IoT Platform. The header includes the platform name and a user profile with ID 611819104022@smartin... and a dropdown for organization selection. The main content area has a dark blue sidebar with navigation icons. The top navigation bar includes 'Back'. The main content area is titled 'Device Drilldown - 09'. On the left is a sidebar with a list of navigation items: 'Device Credentials', 'Connection Information', 'Recent Events', 'State', 'Device Information', 'Metadata', 'Diagnostics', and 'Connection Logs'. The 'Device Credentials' section is selected. The main content area is titled 'Device Credentials' and contains a text block explaining that the user has registered the device to the organization and that they should add credentials to connect it. Below this is a table with the following columns: Organization ID, Device Type, Device ID, Authentication Method, and Authentication Token. The table contains one row of data. At the bottom of the table is a '1 Simulation running' notification. A warning message 'Authentication tokens are non-' is visible at the bottom left of the page.

Organization ID	Device Type	Device ID	Authentication Method	Authentication Token
friec	IoT	09	use-token-auth	12345678

Device ID: 09 Status: Disconnected Device Type: IoT Class ID: Device Date Added: Oct 18, 2022 8:00 PM

Identity Device Information Recent Events State Logs

The recent events listed show the live stream of data that is coming and going from this device.

Event	Value	Format	Last Received
event_1	{"randomNumber":40,"temp":100,"hum":87}	json	a few seconds ago
event_1	{"randomNumber":2,"temp":93,"hum":72}	json	a few seconds ago
event_1	{"randomNumber":24,"temp":92,"hum":76}	json	a minute ago
event_1	{"randomNumber":72,"temp":91,"hum":65}	json	a few seconds ago

1 Simulation running

Thus we created IBM Watson IoT Platform and Device.
