1. CUSTOMER SEGMENT(S)

Who is your customer? i.e. working parents of 0-5 v.o. kids

Customer is a Old man or women who is suffering from helath issues who doesn't have a personal care taker to give prescribed medicine on time.

6. CUSTOMER CONSTRAINTS

What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available

The customer is unaware of the prescription due to lack of knowledge to read a particular prescription.He/She is forgetting to take medicine on time before and after food because no care taker to remind.

5. AVAILABLE SOLUTIONS

CC

RC

Which solutions are available to the customers when they face the

or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital

If the medicine time arrives the web application will send the name to the IoT device. The device will receive the medicine name and notify the voice commands.

2. JOBS-TO-BE-DONE / PROBLEMS

Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.

Forgot to take medicine. The person will be notified to take medicine in a right time using alert messages. It helps the user to do their daily routoine without seeking from other people.

9. PROBLEM ROOT CAUSE

What is the real reason that this problem exists? What is the back story behind the need to do

i.e. customers have to do it because of the change in

The seniors don't have care taker to guide them to take medicine according to the prescription because care taker lead their own life with their busy shedules so there is need of additional source.

7. BEHAVIOUR

What does your customer do to address the problem and get the job done? i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)

The seniors directly seek for help to allot a person or any other devices which is based on reminding the seniors about the medicines which should be taken and monitor around the clock.

3. TRIGGERS

What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.

People simply forget, skip or stop taking their medicines, which leads to non adherence. Trigger helps people to integrate healthy behavior using technology in a simple way in a simple way.

4. EMOTIONS: BEFORE / AFTER

How do customers feel when they face a problem or a job and afterwards? i.e. lost, insecure > confident, in control - use it in your communication strategy & design.

Despite effective treatments, depression may often unrecognize and untreated. Feeling taking correct medicinesat correct times. After the usage of app they feel healthy.

10. YOUR SOLUTION

If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.

If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations. solves a problem and matches customer behaviour

An app is build for the user which enables him/her to set the desired time and medicine name to the IoT device. The device will receive the medicine name and notify the user with voice commands.

8.CHANNELS of BEHAVIOUR

8.1 ONLINE

What kind of actions do customers take online? Extract online channels from #7

What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

Upload details about medicine and get alert messages oncorrect time.

Setting alarm at the correct time.
